

READY SET GROW ACADEMY

EMPOWERED PARENTS UNIVERSITY

Dear Parents/Guardians :

The Ready Set Grow Academy is a learning education agency focused on parental engagement and school-based mentoring. Our intention is to utilize strategic interventions to maximize positive parental and youth outcomes in school districts. We do this through a series of core curriculum focused on: setting personal goals, understanding what type of parent you are, parental essentials, family education classes and the keys to student success for empowered parents.

The numbers don't lie. An education can truly make all the difference in a young person's life. It can make the difference between getting by and getting ahead. The statistics, data and research have shown that minority students are graduating high school at a proportionately lower rate than the national average. In addition, in the United States only 11% of students coming from households where the median income is 35K or lower graduate from four-year universities. Compared to the 82% of students born in the top income percentile.

The Ready Set Grow Academy Empowered Parents University team works to identify, alleviate and ultimately do away with the ever-growing threat of school disengagement for parents and at risk students. That's why we are glad to present the Empowered Parents University for the 2020-2021 school year. Please look out for information and ways to get connected. We will be engaging parents with information, fun and exciting workshops throughout the year.

Thank you for your support and time,

David Jefferson Jr, M.Div.
