**Situational Awareness Report (SIT REP) #190 - 6/20/20 - 0900hrs**

**DATA NOTES:**

- The following counts are generated from cases in the NJDOH Communicable Disease Reporting and Surveillance System (CDRSS) and may include cases that have been recently uploaded by laboratories and not yet evaluated by a local health department (LHD).
- These values are a count of individuals with a positive lab result for SARS-CoV2 (COVID19) and town counts are based on the town assigned as their primary address within CDRSS. The town assignment may change upon investigation by local health departments which may be responsible for a decrease in case counts.
- The number of deaths reported represents the number of deceased individuals who tested positive for COVID19 and reports by town is based on the decedent's primary address in the data system. Particularly in the case of former nursing home residents, the town of assignment may change based on further investigation by local health departments.
- Social distancing, hand hygiene, and other steps to prevent infection must be followed at all times in all municipalities regardless of the number of cases.
- The number of infected individuals in any municipality is likely to be much greater than indicated as this data ONLY includes persons who have been tested and whose lab results have been reported in the State's data system.
- This data will not match any other report since cases are continually entering the system and local health departments may reassign the place of residence as appropriate during their investigations.

- The state is prioritizing requests for PPE and Ventilators. The state will not be processing requests for items that municipalities are able to obtain through their normal procurement procedures.
- NJDOH and the SEOC cannot accept E-Team requests for medicine. Requesters must continue to follow their normal supply chain and procurement procedures for these items.
- All resource requests regardless of originating agency, inclusive of health care facilities should be routed through the NJOEM E-Team Resource Request Process. This process requires requesting agencies initiate the request through their respective County OEM.
