In this module, students analyze arguments and the evidence used to support arguments to determine whether sufficient evidence has been used and whether the evidence is relevant in support of the claim an author or speaker is making. They then research to gather evidence to make their own spoken and written arguments. Students will read Michael Pollan's *The Omnivore's Dilemma* (930L), a literary non-fiction text about where food comes from and about making decisions about what food to buy and eat. They build background knowledge about what happens to food before it gets to the consumer, and the different choices the consumer can make when buying food while analyzing Michael Pollan's arguments and the evidence he uses to support his claims. In Unit 2, students engage in a robust research project in which they further investigate the consequences of each of the food chains and the stakeholders affected in those food chains. To help students

grapple with this issue, they use a decision-making process called "Stakeholder Consequences Decision-Making" (see the end of this document for details). This process will help students understand the implications of various choices, and will scaffold their ability to determine, based on evidence and their own values, to take a position on which food chain they would choose if they were trying to feed everyone in the US. Students finish the module by writing a position paper explaining which of Michael Pollan's food chain they would choose to feed the US and why, and creating a poster stating their position. **This task addresses NYSP12 ELA Standards RI.8.1, W.8.1, W.8.1a, W.8.1b, W.8.1c, W.8.1d, W.8.1e and W.8.9.**

Guiding Questions And Big Ideas

- **Which of Michael Pollan's food supply chains would best feed the US?**
- **How do we make decisions about what we eat?**
- **What journey does food take before it gets to your plate?**
- **Has the author or speaker used sufficient relevant evidence and sound reasoning to support his or her claim?**
- *The food we buy comes to us from various different routes and processes. We can make more informed decisions about what food to buy when we understand those processes and the stakeholders affected by the food choices we make.*

Performance Task

This performance task gives students a chance to share their best reading, writing, and thinking about the question: "Which of Michael Pollan's food supply chains would best feed the United States?" Students will use a powerful excerpt of their position paper, visual components, and text features to create a poster that shows their claim as well as the evidence they used to support their claim. These posters will be displayed around the classroom, with students having the opportunity to do a Gallery Walk of one another's work. **This task addresses NYSP12 ELA Standards RI.8.1, W.8.1, W.8.9, and W.8.9b.**

Content Connections

This module is designed to address English Language Arts standards as students read literature and informational text about the Second Sudanese Civil War. However, the module intentionally incorporates Social Studies Practices and Themes to support potential interdisciplinary connections to this compelling content. These intentional connections are described below.

Big ideas and guiding questions are informed by the New York State Common Core K-8 Social Studies Framework:

Unifying Themes (pages 6–7)

- Theme 4: Geography, Humans, and the Environment: The relationship between human populations and the physical world (people, places, and environments); impact of human activities on the environment; interactions between regions, locations, places, people, and environments.
- Theme 9: Science, Technology, and Innovation: Applications of science and innovations in transportation, communication, military agriculture and industrialization. techno lo

Social Studies Practices, Geographic Reasoning, Grades 5–8:

- Descriptor 2: Describe the relationships between people and environments and the connections between people and places (page 58).
- Descriptor 3: Identify, analyze, and evaluate the relationship between the environment and human activities, how the physical environment is modified by human activities, and how human activities are also influenced by Earth's physical features and processes.

Social Studies Practices, Gathering, Using, and Interpreting Evidence, Grades 5-8:

- Descriptor 1: Define and frame questions about events and the world in which we live and use evidence to answer these questions.
- Descriptor 2: Identify, describe, and evaluate evidence about events from diverse sources (including written documents, works of art, photographs, charts and graphs, artifacts, oral traditions, and other primary and secondary sources).
- Descriptor 4: Describe and analyze arguments of others.
- Descriptor 6: Recognize an argument and identify evidence that supports the argument; examine arguments related to a specific social studies topic from multiple perspectives; deconstruct arguments, recognizing the perspective of the argument and identifying evidence used to support that perspective.

Preparation and Materials

In advance, read the article about the SCDM (Stakeholder Consequences Decision-Making) process to build your own background knowledge about it. You can download the article, “Learning to Make Systematic Decisions,” at the following URL:

http://education.nationalgeographic.com/education/media/learning-make-systematic-decisions/?ar_a=1

This article is not used with students during the module, but it provides some examples of how students have used this process in a science curriculum. Also, note that in this module students are not using the entire SCDM process; they will be learning only the Cascading Consequences and Stakeholders charts.
