

Name: _____

Date: _____

PART A

Bill throws his ball 52 meters, which is 27 meters farther than Samantha threw her ball. How far did Samantha throw her ball? Draw a diagram or picture to show the length of their throws.

Show your work and enter your answer in the space provided.

PART B

Use the broken centimeter ruler to solve the problem.

A grasshopper jumped 7 centimeters forward and 4 centimeters back and then stopped. If the grasshopper started at 18, where did the grasshopper stop? Show your work.
