

Name: _____

Date: _____

At Concessions Unlimited, four granola bars and three drinks cost \$12.50. Two granola bars and five drinks cost \$15.00.

At Snacks To Go, three granola bars and three drinks cost \$10.50. Four granola bars and two drinks cost \$10.00

a) Write a system of equations for each concession stand that models the price of its items.

b) Solve each system of equations. What do the solutions represent?

c) You decide to open a new concession stand and sell granola bars and drinks. Determine a price for each item that differ from the others provided. Write a system of equations to model the prices at your snack bar.

Task is worth a total of **6 points**.

Rubric Part A							
Score	Description
