

Distinguishing the Difference: COVID-19 vs. Allergies vs. Flu

Coronavirus: A large family of viruses that cause illness ranging from the common cold to more severe respiratory diseases. The viruses are transmitted between animals and people.

COVID-19: A mutated version of the coronavirus – called novel. It was first detected in Wuhan, China in November 2019. On March 11, the World Health Organization declared COVID-19 a pandemic.

COVID-19

ALLERGIES

FLU

- Fatigue

PREVENTION

- Avoid exposure whenever possible
- Wash your hands
- Use hand sanitizer with at least 60% alcohol if needed
- Avoid touching your eyes, nose and mouth
- Avoid close contact with others
- Avoid your allergy triggers
- If you're not sure what your triggers are – ask about allergy testing
- Medicate for allergies before pollen season or potential exposure
- Get the flu vaccine
- Avoid close contact with others
- Stay home when you are sick
- Cover your nose & mouth
- Wash your hands
- Avoid touching your eyes, nose & mouth

TREATMENT

- Call your doctor if you think you were exposed
- Stay home except to get medical care
- Stay away from others
- Limit contact with pets
- Call ahead before going to the doctor
- Wear a facemask only if you are sick and around others
- Take prescribed or over-thecounter allergy medications
- Antihistamines
- Nasal sprays
- Immunotherapy where prescribed
- Allergy shots
- Allergy tablets
- Nasal wash/rinse
- Antiviral drugs may be an option for people at high risk for complications and people with lung conditions
- Stay home and rest
- Contact your doctor early if you're at high risk
- Most people don't need to go to the emergency room

What to do if you are sick?

- Call your doctor and discuss your symptoms and potential exposure. Your doctor will decide
 if you should be tested for coronavirus.
- Stay home and self-quarantine yourself. Separate yourself from other people in your home.
- Wear a facemask when around other people.
- Cover your cough and sneezes, or cough into your elbow.
- Wash your hands often, and don't share objects.
- Follow evidence-based guidance from CDC and other credible sources.
- Seek immediate medical attention if you have difficulty breathing, experience chest pain, have bluish lips or face, or you're unable to arouse or stay awake.
