VISUAL & PERFORMING ARTS DEPARTMENT

STAGECRAFT: COURSE PHILOSOPHY/PURPOSE/VISION STATEMENT

Tell me and I will forget;
Show me and I may remember;
Involve me and I will understand.
-Confucius (450 BCE)

The arts are all about authentic performance, much more so than other academic areas.
-Jay McTighe (Teaching Theatre Journal, Summer 2012)

There’s no business like show business.
-Irving Berlin (“Annie Get Your Gun” 1946)

Stagecraft, or the study of Technical Theatre, is the sole domain of Visual and Performing Arts learning that combines the fields of visual art, performance, technology, vocational training, industrial arts, design, business management, architecture, drafting, cultural history, and of course, theatrical arts. It is therefore, perhaps the most important arts course any institution of learning can offer. In an era when woodshops have been replaced by computer labs, it provides an effective bridge between knowing the difference between a crescent wrench and a socket wrench, and manipulating a computer generated building plan.

Current educational strategies are increasingly focused on “Project Based Learning”, and assessments that require students to complete “Performance Tasks”. It is most apropos that Stagecraft incorporates both of these educational strategies: scenery to be built and lighting and sound designs that must be executed in live performance. Stagecraft is also a collaborative practice, observing certain hierarchies and job descriptions that must work in concert with one another. Unlike a large chorus or concert band, where a mistake by a single singer or player might make the audience wince momentarily, mistakes made when a sound or lighting cue is missed, or when a prop or piece of furniture is out of place can often bring a live performance to a grinding halt, or result in dangerous, even injurious situations for performers and members of the audience. [Research the trials and tribulations of Broadway’s “Spiderman, Turn Off the Dark.”]

The beauty of Stagecraft is found in its innate quality of inter-disciplinary connection and real-world application. No matter what the area of study, the educator and student will find content strands that can be directly applied in a Stagecraft class. As much as possible (due to the fluid nature of current core curriculums on the national and state levels), this curriculum guide strives to provide references to Core Curriculum Content Standards for the Student Learning Objectives of this course. The reader will discover that almost every content area is represented.

Stagecraft is by definition, a CRAFT. Therefore, the learning must be executed and assessed using visible, audible, tangible, intellectual and even spiritual standards and artifacts. For the purpose of Theatre, as is the case will all Visual and Performing Arts, is to elicit deep emotional and intellectual connections between artists and each and every member of an audience. Upon the successful completion of Stagecraft, students will exit having gained skills, knowledge and enduring understandings that will benefit them for the rest of their lives, regardless of whether they pursue a career in theatre. Whether they are called on to express abstract ideas in a political forum, build bookshelves for a new home, paint walls for Habitat for Humanity, or get the lighting just right in a fussy baby’s bedroom… Stagecraft will provide skills and knowledge that will continue to answer daily needs far into their futures.
STAGECRAFT

Course Description:
Stagecraft (grades 9-12)
Full Year (5 credits) – Prerequisite: successful completion of General Drama and/or teacher referral
The objective of this course is to introduce the student to the fundamental elements and principals of technical theatre through hands-on learning that makes use of the production facilities, operations, methods, and technologies used at the Orange Preparatory Academy Auditorium, and to relate these practices to those used in professional, amateur, and educational theaters. The course will include a brief history of theatrical stages and technology, and an overview of professional theatre and associated labor unions. Students will learn the functions of the creative team, production staff, technicians and stage crew. Basic elements of scenic construction, design concepts, theatrical lighting, sound technologies, and stage management will be introduced and assessed through practical application.
Participation in either the OPA or OHS Stage Crew is required for this course.

Course Units and Associated Topics:
The following is an overview of the units and associated topics covered in this course. It is important to note that due to the interrelatedness of all areas of Technical Theatre, certain topics may overlap or be introduced out of sequence and revisited for more in-depth study at different points during the course year.

Unit I: Introductions: Stage/Stagecraft/Auditorium
1. Theatre Safety - Fire Safety
2. Introduction to Orange Prep’s Proscenium Stage
3. Introduction to Technical Theatre: What is Stagecraft?
4. Historical Overview – Evolution of the Stage from Epidaurus to Broadway
5. Types of Stages/Stage Geography

Unit II: Personnel and Operations
6. Theatre Hierarchy
7. Stage Crew Operations (Deck Protocol/Telex Communication/Rigging/Follow Spot)
8. Basics of Sound Amplification/OPA Sound System

Unit III: Scenic Elements and Set Construction
9. Scenic Elements: Flats, Platforms, Wagons, Stairs, Drops, etc.
10. Set Construction: Planning
11. Scenery Shop Safety
12. Set Construction: Practical Application
13. Elements of Scenic Art: Paints/Fabrics/Coverings

Unit IV: Design/Practical Applications for Lighting, Sets and Sound
14. Theatrical Lighting Basics
15. Introduction To Lighting Design
17. Introduction To Sound Design

Unit V: Production Management/Careers
19. Production Stage Management
20. Theatrical Careers/Union Affiliations

Text Books/Resources:
Practical Technical Theatre, Interactive DVD Series, Interactive Educational Video LLC, 2013
Theatre Talk: An Illustrated Dictionary of Theatre Terms and Definitions, R. Anderson, Pioneer Drama Service
Stagecraft 1, Stagecraft Workbook 1, William H. Lord, Meriwether Publishing Ltd., Woodstock, IL, 2000
The following objectives are provided to guide the instructor in the construction of daily lesson planning. The objectives below specify desired behaviors the instructor expects her/his students to display. Starting with these Student Learning Objectives, the instructor is free to specify conditions specific to her/his own teaching preferences to facilitate these behaviors. The further addition of required criterion, or the level of proficiency or mastery desired for the outcome, allows the instructor to transform these basic SLO’s into “three-part” objectives currently required in district lesson planning.

This link provides a helpful guide to constructing effective three-part objectives: http://www.nerc.com/files/Instructional_guide_writing_Objectives.pdf

</thead>
<tbody>
<tr>
<td>UNIT I: Introduction to Stage/Auditorium/ Stagecraft #1, Theatre Safety- Fire Safety</td>
<td>Identify and qualify all areas and equipment in the theatre that have the potential to cause significant harm leading to serious injury or fatality.</td>
<td>2.1.8.D.1</td>
</tr>
<tr>
<td></td>
<td>Identify and analyze safety precautions present in the theatre.</td>
<td>5.1.12.C.2</td>
</tr>
<tr>
<td></td>
<td>Research, compare and contrast the history of famous theatre fires, synthesizing the resulting fire codes of the present day.</td>
<td>NSAE T.5.9-12*</td>
</tr>
<tr>
<td></td>
<td>Understand and/or demonstrate proper usage of the fire curtain, fire extinguishers and emergency procedures of OPA Auditorium.</td>
<td>*National Standards for Arts Education</td>
</tr>
<tr>
<td>#2 Intro to OPA’s Proscenium Stage</td>
<td>Identify and define all aspects and components of Orange Preparatory Academy’s proscenium stage.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Explore, label and define usage of all areas adjacent to the stage within the auditorium complex: basement scenery storage area; dimmer room; costume/fabric storage; second level galleries; top grid; house; lobby; balcony; sound/lighting booth.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Recognize and explain usage of terminology to define the space: theatre; theater; auditorium.</td>
<td>CCSS L.9-10.6</td>
</tr>
<tr>
<td></td>
<td></td>
<td>CCSS L.11-12.6</td>
</tr>
<tr>
<td>#3 Introduction to Technical Theatre: What is Stagecraft?</td>
<td>Ascertain the aesthetic impact that the level of technical proficiency has on a play and production, taking such contextual factors into account as the performance space, performance intent, scale of production, budget, etc.</td>
<td>1.4.12.B.3</td>
</tr>
<tr>
<td>#3 Introduction to Technical Theatre: What is Stagecraft? (cont’d.)</td>
<td>Examine applications of recent forms of technology in theatrical work. Determine the impact of technology on the way audiences perceive multimedia/theatrical art forms and how it impacted consumers, creators, and performers worldwide. Identify, define and compare components and disciplines of theatrical technologies. Trace the developments of the technical aspects of Western Theatre since its inception.</td>
<td>1.4.12.B.3</td>
</tr>
<tr>
<td></td>
<td>Identify, define and compare components and disciplines of theatrical technologies.</td>
<td>NSAE T.3.9-12</td>
</tr>
<tr>
<td>#4 Historical Overview - Evolution of the Stage</td>
<td>Compare and contrast stages of Ancient Greece, the Roman Empire, 1st century Japan, Medieval Europe, Elizabethan England, French/Italian Restoration; and contemporary eras. Explore and evaluate the impact of historical cultural and societal trends on performance venues of different time periods.</td>
<td>1.4.12.A.3 6.2.12.D.4.k</td>
</tr>
<tr>
<td></td>
<td>Hypothesize and express appropriate uses of different stages in relations to specific theatrical genres, traditions and aesthetics.</td>
<td>CCSS SL.9-10.4 CCSS LS.11-12.4</td>
</tr>
<tr>
<td>#5 Types of Stages/Stage Geography</td>
<td>Identify and define the properties of different theatrical performance spaces: proscenium stage; Amphitheatre; thrust (3/4) stage; arena stage (theatre-in-the-round); black box space. Hypothesize and express appropriate uses of different stages in relations to specific theatrical genres, traditions and aesthetics.</td>
<td>NSAE T.3.9-12</td>
</tr>
<tr>
<td>UNIT II: Personnel and Operations</td>
<td>Define the areas of responsibility (e.g., actor, director, producer, scenic, lighting, costume, stagehand, etc.) and necessary job skills of the front and back-of-house members of a theatre company. Distinguish skill set required for theatrical creative and technical team positions and determine personal suitability for one or more specific job titles.</td>
<td>1.1.8.C.4 9.3.12.C.5</td>
</tr>
<tr>
<td>#6 Theatre Hierarchy</td>
<td>Demonstrate and practice knowledge and abilities necessary to perform basic OPA/OHS Stage Crew functions: Telex operations; protocols for responding to directions from Production Stage Manager; microphone management; curtain management; backstage etiquette; “spiking”; follow spot operation; projection screen implementation. Demonstrate and practice proper handling, use, maintenance of XLR, lighting and electrical cables. Memorize, justify, recall and demonstrate proper and SAFE procedures for operation of the OPA stage counter-weight rigging system: Glove, Grab, Spot, Shout, Spot, Un-loop, Unlock, Pull, Lock and Loop Create and implement hypothetical performance conditions.</td>
<td>NSAE T.3.9-12</td>
</tr>
<tr>
<td>#7 Stage Crew Operations</td>
<td></td>
<td>CCSS SL.9-10.2 CCSS SL.11-12.2</td>
</tr>
<tr>
<td>#8 Basics of Sound Amplification-OPA Sound System Operation</td>
<td>Identify and explain uses of the various microphones used in the OPA Auditorium and demonstrate procedures for connecting them into the sound system.</td>
<td>NSAE T.3.9-12</td>
</tr>
<tr>
<td>---</td>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td>UNIT III: Scenic Elements and Set Construction</td>
<td>Hypothesize, implement and justify various microphone/amplification set-ups for different events: concert; play; meeting; assembly; etc.</td>
<td>1.3.8.D.1</td>
</tr>
<tr>
<td>#9 Scenic Elements</td>
<td>Observe and classify basic terminology and categories of theatrical scenic design: unit sets; box sets; curtain/drop sets; realistic; abstract; etc.</td>
<td>NSAE T.3.9-12</td>
</tr>
<tr>
<td>Recognize, label and compare elements commonly found in scenic designs: cubes; flats; triangles (periaktoi); stationary platform units; mobile platform units (eccyclema); drops; stair units; flown components; set properties/props; hand properties/props; set decoration.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>#10 Set Construction: Planning</td>
<td>Analyze, differentiate and interpret floor plans, elevations and renderings of sample set designs.</td>
<td>CCSS 7.RP.A.2</td>
</tr>
<tr>
<td>Prepare a hand drawn floor plan (to scale) of the stage with given pre-set scenic elements/requirements.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Create and render an original floor plan and translate it to the stage floor (spike the plan).</td>
<td></td>
<td></td>
</tr>
<tr>
<td>#11 Scenery Shop Safety</td>
<td>Memorize, recall and demonstrate basic safety procedures for the proper and safe maintenance and storage of items used during set construction.</td>
<td>1.1.12.C.3 5.1.8.D.3</td>
</tr>
<tr>
<td>Express and justify reasoning behind safety procedures regarding work area, personal space and collaborative space.</td>
<td>2.1.8.D.1</td>
<td></td>
</tr>
<tr>
<td>#12 Set Construction: Practical</td>
<td>Identify, recall and demonstrate operational knowledge, application and proper use of tools used for measuring and marking of materials.</td>
<td>2.1.8.D.1</td>
</tr>
<tr>
<td>Identify, recall and demonstrate operational knowledge, application and proper use of hand tools used for cutting and joining of materials.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Identify and describe types and associated purposes of lumber used for set construction.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Describe and exhibit knowledge of safe and proper handling for selected power tools: drivers; jig-saw; table saw.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Identify and describe types and associated purposes of soft goods and fabrics used for set construction.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Describe and differentiate the nature of flame retardant (FR) and inherently flame retardant (IFR) materials.</td>
<td>2.1.8.D.1</td>
<td></td>
</tr>
<tr>
<td>Demonstrate and apply proper usage of all construction tools.</td>
<td>2.1.8.D.1</td>
<td></td>
</tr>
<tr>
<td>Construct a flat (full size or scaled down), rehearsal cube or other unit of scenery.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>#13 Elements of Scenic Art</td>
<td>Observe and relate best practice protocols and safety guidelines for <em>Strike/Striking the Set.</em></td>
<td>5.1.8.D.3</td>
</tr>
<tr>
<td>---------------------------</td>
<td>-------------------------------------------------------------------------------------------------</td>
<td>----------</td>
</tr>
<tr>
<td><strong>UNIT IV: Design/Practical Applications for Lighting, Set and Sound</strong></td>
<td>Identify and compare scenic painting techniques: dry-brushing; splattering; distressing; sponge techniques; etc.</td>

### COURSE: STAGECRAFT

<table>
<thead>
<tr>
<th>UNIT I: Introductions: Stage/Stagecraft/Auditorium</th>
<th>TOPIC #1: Theatre Safety - Fire Safety (part 1)</th>
</tr>
</thead>
</table>

#### CONTENT:
- Theatres, as public gathering spaces, are strictly regulated by state and local fire safety and capacity regulations.
- Theatres disasters throughout history have resulted in the continuing process of fire and safety regulations.
- Technical staff in the theatre is responsible for maintaining a safe environment and complying with all fire and safety regulations.

#### STUDENT LEARNING OBJECTIVES:
- Identify and qualify all areas and equipment in the theatre that have the potential to cause significant harm leading to serious injury or fatality.
- Identify and analyze safety precautions present in the theatre.

#### Essential Question(s) (General):
- To what extent can we keep ourselves safe and injury free?
- What rules are general and what rules are situation specific?

#### Essential Question(s) (Topic Specific):
- How many ways can a theatre kill or seriously injure you?
- Why do we have rules regulating safety in the OPA Auditorium?

#### Suggested Activities:
- Prompted observation/writing – First Journal Entries
- Obstacle course: Instructor sets up various obstacles on stage, including lowered electrics, closed curtains, cables, cubes, etc. Students verbally guide blindfolded classmates successfully on various pathways around the stage.
- Hands-on: counter-weights; clearing clutter (striking the obstacle course)
- Reading: “fine print” Auditorium Use Form-find safety issues
- Scavenger Hunt: Collaborative groups hunt for items
- Preliminary stage/house tour

#### Assessment:
- Accurate verbal expression/written response
- Group cooperation
- Self/group assessment

#### Resources:
- Access to OPA Auditorium Facilities

#### Interdisciplinary Connections:
- ELA: Journal
- Health & Safety
- Architecture: Classic Greek Style
- Civics: Laws governing public gathering spaces
### CONTENT:

- Theatres, as public gathering spaces, are strictly regulated by state and local fire safety and capacity regulations.
- Theatre disasters throughout history have resulted in the continuing process of fire and safety regulations.
- Technical staff in the theatre is responsible for maintaining a safe environment and complying with all fire and safety regulations.

### STUDENT LEARNING OBJECTIVES:

- Research, compare and contrast the history of famous theatre fires, synthesizing the resulting fire codes of the present day
- Identify and analyze safety precautions present in the theatre.
- Understand and/or demonstrate proper usage of the fire curtain, fire extinguishers and emergency procedures of OPA Auditorium.

### Essential Question(s) (General):

- What is the significance of the phrase “Those who do not learn from history are doomed to repeat it”? (Winston Churchill)

### Essential Question(s) (Topic Specific):

- Why are there so many laws, rules and regulations regarding fire safety in theatres?
- What are the fire safety rules and response protocols in the OPA Auditorium?

### Suggested Activities:

- Review scavenger hunt from previous lesson – target safety precautions related to fire safety.
- HW/follow up discussion/share: theatre fire web image search.
- Instruction and practice fire curtain deployment/retraction
- Instruction and demo fire extinguisher use (PASS: pull pin; aim; squeeze; spray)

### Resources:

- Access to OPA Auditorium Facilities
  http://www.hstech.org/

### Assessment:

- Successful demonstration of learned skills
- Discussion cooperation
- Homework completion
- Self/group assessment

### Interdisciplinary Connections:

- ELA: Journal
- Health & Safety
- Civics: Fire regulations
- History: Research early theatre disasters

---

### COURSE: STAGECRAFT

#### UNIT I: Introductions: Stage/Stagecraft/Auditorium

#### TOPIC #2: Intro to OPA’s Proscenium Stage

### CONTENT:

- The Orange Preparatory Academy Auditorium is a precious district resource that serves the needs of the Board of Education, Orange High School, Orange Preparatory Academy, and the City of Orange Township.
- Overview of OPA Auditorium facility and associated theatre vocabulary
### STAGECRAFT CURRICULUM

#### STUDENT LEARNING OBJECTIVES:
- Identify and define all aspects and components of Orange Preparatory Academy’s proscenium stage
- Explore, label and define usage of all areas adjacent to the stage within the auditorium complex: basement scenery storage area; dimmer room; costume/fabric storage; second level galleries; top grid; house; lobby; balcony; sound/lighting booth.
- Recognize and explain usage of terminology to define the space: theatre; theater; auditorium.

#### Essential Question(s) (General):
- “What’s in a name? That which we call a rose, by any other name, would smell as sweet…” Shakespeare

#### Essential Question(s) (Topic Specific):
- Why are so many of the terms we use to describe a stage the same as terms used to describe ships?
- What is the difference between an auditorium, a theatre and a theater?

#### Suggested Activities:
- Full tour of the auditorium and adjoining spaces.
- *Practical Technical Theatre DVD Series (PTT)* - Program 1, Days 5 & 6
- Completion of *Intro to Proscenium Stage* worksheets.
- Collaborative Group Definition Search for words: auditorium; theatre; theater. Groups present findings to class.

#### Resources:
- Access to OPA Auditorium Facilities
  - [http://www.hstech.org/](http://www.hstech.org/)
  - *Practical Technical Theatre DVD Series, Program 1*

#### Assessment:
- Completion of Worksheets
- Group cooperation/presentations
- Self/group assessment

#### Interdisciplinary Connections:
- ELA: Vocabulary/Oral presentation
- History: Nautical legacies
- Health & Safety

---

#### COURSE: STAGECRAFT

#### UNIT I: Introductions: Stage/Stagecraft/Auditorium

#### CONTENT:
- Theatre production is an art, but it is also a science requiring knowledge of safety procedures, materials, technology, and construction techniques.
- Art and art-making reflect and affect the role of technology in a global society.
- Advances in technology effect and impact the arts and art-making and, in turn, impact the society/audience.

#### STUDENT LEARNING OBJECTIVES:
- Ascertain the aesthetic impact that the level of technical proficiency has on a play and production, taking such contextual factors into account as the performance space, performance intent, scale of production, budget, etc.
- Examine applications of recent forms of technology in theatrical work. Determine the impact of technology on the way audiences perceive multimedia/theatrical art forms and how it impacted consumers, creators, and performers worldwide.

#### Essential Question(s) (General):
- What is the difference between a “passive” and an “active” member of an audience?
- How is observation impacted by knowledge?
- How do technological advances impact the arts?

#### Essential Question(s) (Topic Specific):
- What is Stagecraft?
- Is Technical Theatre “art” or “technology”?
### Suggested Activities:

- **PTT, DVD Program 1, Introduction**
- **Audience Participation Exercise:** *Sample: Instructor presents short recitation/performance/song. Instructor or student leader then “warms-up” the crowd with clapping/stomping/chanting/etc. Instructor repeats presentation. Discuss differences in levels of engagement. Record reactions in journal.*
- **Observation/Video Clips:** Broadway; regional theatre; OPA/OHS productions; Shakesperience; street performances, outdoor festivals with and without tech
- **Written/verbal response to viewing with focus on impact of lights, sound sets, costumes, etc.**

### Resources:

- Access to OPA Auditorium Facilities
- [http://www.hstech.org/](http://www.hstech.org/)
- *Practical Technical Theatre DVD Series,* Program 1
- You tube (download) Outdoor Stage Combat at Chesapeake Shakespeare Company
- Video Clips: Broadway.com/Orangearts.net

### Assessment:

- Thoughtful verbal expression/written response
- Group cooperation
- Self/group assessment

### Interdisciplinary Connections:

- **ELA:** Journal
- **Speaking/Listening:** Oral expression/Auditory cognition
- **Science:** Impact of technological advances

---

### COURSE: STAGECRAFT

#### GRADES 9-12

#### UNIT I: Introductions: Stage/Stagecraft/Auditorium

#### TOPIC #3: Introduction to Technical Theatre: What is Stagecraft? (part 2)

### CONTENT:

- Theatre production is an art, but it is also a science requiring knowledge of safety procedures, materials, technology, and construction techniques.
- Art and art-making reflect and affect the role of technology in a global society.
- Advances in technology effect and impact the arts and art-making and, in turn, impact the society/audience.

### STUDENT LEARNING OBJECTIVES:

- Identify, define and compare components and disciplines of theatrical technologies.
- Trace the developments of the technical aspects of Western Theatre since its inception.

### Essential Question(s) (General):

- What meaning is inferred by the quote, “The whole is greater than the sum of its parts” (Aristotle)?
- Do we need technology to live?

### Essential Question(s) (Topic Specific):

- What are the technical components that go in to the creation of a live, theatrical performance?
- How does technology impact live performance?
### Suggested Activities:
- HW: Home inventory “technology”. Classify re: necessary for survival.
- Human Evolution Thought Experiment: Students required to use imagination to transport themselves into the mindset of early/ancient/medieval/renaissance/American Colonial/Early 20th century experiences (use memories of film, TV, etc.)
- Show & Tell & Justify Technology (HW)
- Revisit observation records of previous viewing: identify theatre technology.
- Observe and compare: Lion King antelope stampede sequence with 17th century Palatina Wave Machine
- Create wave effects with fabric panels (i.e. poly-silk)

### Resources:
- Access to OPA Auditorium Facilities
- Links (Lion King)
  - [http://www.hstech.org/](http://www.hstech.org/)
  - [http://spectacle.appstate.edu/models](http://spectacle.appstate.edu/models)

### Assessment:
- Successful completion of Homework
- Accurate verbal expression/written response
- Group cooperation
- Self assessment: Journal

### Interdisciplinary Connections:
- ELA: Journal
- History: Recollection and focus on prior knowledge
- Speaking/Listening: Oral expression/Auditory cognition
- Science: Impact of technological advances
- Technology: Digital Research

---

<table>
<thead>
<tr>
<th>COURSE: STAGECRAFT</th>
<th>GRADES 9-12</th>
</tr>
</thead>
<tbody>
<tr>
<td>UNIT I: Introductions: Stage/Stagecraft/Auditorium</td>
<td>TOPIC #4: Historical Overview - Evolution of the Stage</td>
</tr>
</tbody>
</table>

### CONTENT:
- Criteria for assessing the historical significance, craftsmanship, cultural context, and originality of art are often expressed in qualitative, discipline-specific arts terminology.
- Artistic styles, trends, movements, and historical responses to various genres of art evolve over time.

### STUDENT LEARNING OBJECTIVES:
- Compare and contrast stages of Ancient Greece, the Roman Empire, 1st century Japan, Medieval Europe, Elizabethan England, French/Italian Restoration; and contemporary eras.
- Explore and evaluate the impact of historical cultural and societal trends on performance venues of different time periods.

### Essential Question(s) (General):
- How does the past influence the present?
- What impact did religion have on ancient and early societies and cultures?

### Essential Question(s) (Topic Specific):
- Did someone “invent” the stage?
- Why does a proscenium stage look the way it does?
### Suggested Activities:
- HW: individually or in pairs, research images of stages/performance spaces from a specific time period.
- Presentations of HW findings: oral and demonstrative (using lumber and prop scraps to represent differing stage configurations)
- Compare and share presentations to OPA stage through discussion and journal entries.
- Creation of a time line using shared knowledge.

### Resources:
- Access to OPA Auditorium Facilities
- http://www.hs技术.org/
- http://medievaltheatre13.blogspot.com/
- https://www.theatrefolk.com/spotlights/japanese-noh

### Assessment:
Successful HW completion and accompanying presentation of findings
Timeline execution
Group cooperation
Self/group assessment: HW and Journal entries

### Interdisciplinary Connections:
ELA: Journal/Oral presentation
History: progression from ancient times
Architecture
Technology: Digital Research

---

### COURSE: STAGECRAFT
**UNIT I: Introductions: Stage/Stagecraft/Auditorium**
**TOPIC #5: Types of Stages/Stage Geography**

### CONTENT:
- Theatres have various types of stages and performance areas.
- Performance areas/stages are divided into definable areas.
- Certain stages are more conducive for the production of certain productions.

### STUDENT LEARNING OBJECTIVES:
- Identify and define the properties of different theatrical performance spaces: proscenium stage; Amphitheatre; thrust (3/4) stage; arena stage (theatre-in-the-round); black box space.
- Hypothesize and express appropriate uses of different stages in relations to specific theatrical genres, traditions and aesthetics.

### Essential Question(s) (General):
- How do physical spaces and environments impact our intellectual perceptions and emotional state?

### Essential Question(s) (Topic Specific):
- How does the relationship of performing space to audience impact a production?
- How are the different parts of the performance area defined?
Suggested Activities:
• *PTT*, DVD Program 1, Days 2 & 3
• Game: “Gypsies & Shakespeare” (Ships & Sailors with theatrical terminology embedded).
• Create stage maps: C; SR; SL; UC; USR; USL; DC; DSR; DSL
• Challenge student groups to create different stage area/audience configurations using chairs to outline the audience space and rehearsal cubes or tape to outline the stage area.
• Unit I Review

Assessment:
Game participation
Successful completion of stage map
Group cooperation
Self/group assessment (Journal)

UNIT I: Written Assessment/Performance Task

Resources:
Access to OPA Auditorium Facilities
http://www.hstech.org/
*Practical Technical Theatre DVD Series*, Program 1

Interdisciplinary Connections:
ELA: Journal
Architecture

UNIT II: Personnel and Operations

TOPIC #6: Theatre Hierarchy

CONTENT:
• A team of artists, technicians, and managers who collaborate to achieve a common goal uses a broad range of skills to create theatrical performances.

STUDENT LEARNING OBJECTIVES:
• Define the areas of responsibility (e.g., actor, director, producer, scenic, lighting, costume, stagehand, etc.) and necessary job skills of the front and back-of-house members of a theatre company.
• Distinguish skill set required for theatrical creative and technical team positions and determine personal suitability for one or more specific job titles.

Essential Question(s) (General):
• What is the importance of the leader/follower relationship in a productive social structure?
• What is a hierarchy?

Essential Question(s) (Topic Specific):
• What is the chain of command on and off stage in a theatre?
### Suggested Activities:

- **PTT**, DVD Program 1, Days 1 & 2
- Creation of Theatrical Hierarchy web or tree on paper.
- Creation of Theatrical Hierarchy web or tree with students on their feet: each student carries identifying signs and they must arrange themselves in correct order of which position their job position has in the hierarchy.
- Create a game of *Stagecraft Clue* [i.e. Mr. Body was killed by the Production Stage Manager, in the Right Wing, with a 25lb. counterweight]

### Resources:

- Access to OPA Auditorium Facilities
- *Practical Technical Theatre DVD Series*, Program 1
- [http://www.hstech.org/](http://www.hstech.org/)

### Assessment:

- Accurate verbal expression/written response
- Group cooperation
- Self/group assessment (Journal)

### Interdisciplinary Connections:

- **ELA**: Journal; Speaking/Listening
- **Careers**: Workplace hierarchies

---

### COURSE: STAGECRAFT  
GRADERS 9-12

#### UNIT II: Personnel and Operations  
**TOPIC #7**: Stage Crew Operations

#### CONTENT:

- A team of artists, technicians, and managers who collaborate to achieve a common goal uses a broad range of skills to create theatrical performances.
- Theatre production is an art, but it is also a science requiring knowledge of safety procedures, materials, technology, and construction techniques.
- Specific protocols and practices are employed by the stage crew during performances to facilitate smooth operations.

#### STUDENT LEARNING OBJECTIVES:

- Demonstrate and practice knowledge and abilities necessary to perform basic OPA/OHS Stage Crew functions: Telex operations; protocols for responding to directions from Production Stage Manager; microphone management; curtain management; backstage etiquette; “spiking”; follow spot operation; projection screen implementation.
- Demonstrate and practice proper handling, use, maintenance of XLR, lighting and electrical cables.
- Memorize, justify, recall and demonstrate proper and SAFE procedures for operation of the OPA stage counter-weight rigging system: Glove, Grab, Spot, Shout, Spot, Un-loop, Unlock, Pull, Lock and Loop
- Create and implement hypothetical performance conditions.

#### Essential Question(s) (General):

- What is the importance of “on-the-job training”?
- What is the significance of the phrase, “a job worth doing, is a job worth doing well”?

#### Essential Question(s) (Topic Specific):

- Who is whose boss on and off stage?
- What are stage crew protocols?
<table>

<td>• Identify and explain uses of the various microphones used in the OPA Auditorium and demonstrate procedures for connecting them into the sound system.</td>
</tr>
<tr>
<td><strong>TOPIC #8: Basics of Sound Amplification-OPA Sound System Operation</strong></td>
<td>• Hypothesize, implement and justify various microphone/amplification set-ups for different events: concert; play; meeting; assembly; etc.</td>
</tr>
</tbody>
</table>

**CONTENT:**
- Theatre production is an art, but it is also a science requiring knowledge of safety procedures, materials, technology, and construction techniques.
- Introductory knowledge of sound amplification in the OPA Auditorium

**Essential Question(s) (General):**
- What is the significance of the phrase, “If a tree falls in the forest, and there is no one there to hear it, does it make a sound”?

**Essential Question(s) (Topic Specific):**
- How does a sound system work?
- What microphone is best for my needs and how do I make it work?

**Suggested Activities:**
- Inventory microphones and associated uses.
- Review sound cable folding techniques.
- Trial and demonstrations of microphones and capabilities.
- Guide students through whys and wherefores of microphone configurations: BOE meetings; Music Concert; Dance Concert
- Repeat stage crew drills with addition of microphones.
- **Unit II Review**

**Resources:**
Access to OPA Auditorium Facilities
http://www.hstech.org/
### UNIT III: Scenic Elements and Set Construction

#### TOPIC #9: Scenic Elements

**CONTENT:**
- Theatrical settings are created using a variety of methods, the most common being constructed scenery.
- Theatrical scenery can be identified by its elements, components, materials, methods of mobility, artistic genre and other signifiers.

#### STUDENT LEARNING OBJECTIVES:
- Observe and classify basic terminology and categories of theatrical scenic design: unit sets; box sets; curtain/drop sets; realistic; abstract; etc.
- Recognize, label and compare elements commonly found in scenic designs: cubes; flats; triangles (periaktoi); stationary platform units; mobile platform units (eccyclema); drops; stair units; flown components; set properties/props; hand properties/props; set decoration.

**Essential Question(s) (General):**
- How do artists translate and condense the world into settings?

**Essential Question(s) (Topic Specific):**
- What is a theatrical set composed of?
- What features define specific types of sets?

**Suggested Activities:**
- HW: Web image search for set designs.
- Classify set design images (HW) into categories: box set; unit set; backdrops; fabric/curtained sets; permanent and movable elements; combinations
- Using simple paper, cardboard or foam core, create manipulative to represents standard scenic elements. Use to create simulations of set models.

**Assessment:**
- Successful completion of Homework
- Active verbal expression
- Group cooperation
- Self/group assessment (Journal)

**Interdisciplinary Connections:**
- ELA: Journal
- Science: Acoustics
- Technology: Analog Amplification

---

### UNIT III: Scenic Elements and Set Construction

#### TOPIC #10: Set Construction: Planning

---

**COURSE:** STAGECRAFT  
**GRADES 9-12**
**Stagecraft Curriculum**

**CONTENT:**
- Plans for three-dimensional objects and designs can be expressed in two-dimensional terms using scale measurement.
- Set designs are commonly expressed in two-dimensions using floor plans, elevations and renderings.

**STUDENT LEARNING OBJECTIVES:**
- Analyze, differentiate and interpret floor plans, elevations and renderings of sample set designs.
- Prepare a hand drawn floor plan (to scale) of the stage with given pre-set scenic elements/requirements.
- Create and render an original floor plan and translate it to the stage floor (spike the plan).

**Essential Question(s) (General):**
- How are three-dimensional ideas expressed in two dimensions?
- How are mathematic principals used to express objects and spatial relationship?

**Essential Question(s) (Topic Specific):**
- What does the term “to scale” mean?
- How are set designs expressed?

**Suggested Activities:**
- HW: student creates a rough floor plan of a room in his/her home
- Create scale floor plans (using 1/4" graph paper) of sample “rooms” (HW) or set configurations created with rehearsal cubes, chairs and spike tape “walls”.
- Translate floor plans (or configuration of rehearsal cubes) into one-point perspective renderings.
- Translate floor plans (or configuration of rehearsal cubes) into elevation sketches.
- Exploration of simple CAD software programs (technology availability permitting): Vectorworks; Google Sketchup

**Resources:**
- Access to OPA Auditorium Facilities
- Practical Technical Theatre DVD Series
  - [http://www.hstech.org/](http://www.hstech.org/)
  - Google Sketchup Tutorial: [http://www.youtube.com/watch?v=OPkv9tRuO-c](http://www.youtube.com/watch?v=OPkv9tRuO-c)

**Assessment:**
- Successful completion of HW
- Successful attempts at written requirements: floor plan, rendering, elevations
- Group cooperation
- Self/group assessment (Journal)

**Interdisciplinary Connections:**
- ELA: Journal
- Mathematics: scale and perspective/spatial relationships
- Architecture: Drafting

**COURSE: STAGECRAFT**
**GRADES 9-12**

**UNIT III: Scenic Elements and Set Construction**

**TOPIC #11: Scenery Shop Safety**

**CONTENT:**
- Evaluating the potential for injury prior to engaging in unhealthy/risky behaviors impacts choices.
- Introduction to creating and maintaining a safe and collaborative working environment for the purpose of scenery construction.
**STUDENT LEARNING OBJECTIVES:**

- Memorize, recall and demonstrate basic safety procedures for the proper and safe maintenance and storage of all tools and materials used during set construction.
- Express and justify reasoning behind safety procedures regarding work area, personal space and collaborative space.

**Essential Question(s) (General):**

- What is the importance of order and organization in the workplace?
- Why is “a place for everything, and everything in its place,” a vital organizational mantra?

**Essential Question(s) (Topic Specific):**

- What are the rules regulating safe procedures for set construction on the OPA stage?

**Suggested Activities:**

- PTT, Interactive DVD, Program 2
- Observation, respond (verbal and written) Load in videos
- Create simulations of un-safe situations that students must solve.
- “Seek & find” exercise: safety equipment (gloves, safety glasses, first aid kit, fire extinguisher, etc.)

**Resources:**

- Access to OPA Auditorium Facilities
- *Practical Technical Theatre DVD Series*
- http://www.hstech.org/
- YouTube search: “IATSE Loads in”

**Assessment:**

Successful completion of worksheets
Active verbal input/response
Group cooperation
Self/group assessment (Journal)

**Interdisciplinary Connections:**

- ELA: Journal; Speaking/Listening
- Health: Safety
- Science: Safe Handling of Equipment

---

**COURSE: STAGECRAFT**

**UNIT III: Scenic Elements and Set Construction**

**TOPIC #12: Set Construction: Practical (part 1)**

**CONTENT:**

- Construction requires general and practical knowledge of available tools and materials.
- Overview of safe and appropriate use of measuring tools, cutting and joining tools, power tools, lumber products and theatrical fabrics.
- Scenery construction is different from “real-world” construction. Though it is real and functional it is also temporary and representational.
- Practical application of set construction tools and materials.

**STUDENT LEARNING OBJECTIVES:**

- Identify, recall and demonstrate operational knowledge, application and proper use of tools used for measuring and marking of materials.
- Identify, recall and demonstrate operational knowledge, application and proper use of hand tools used for cutting and joining of materials.
- Identify and describe types and associated purposes of lumber used for set construction.
- Describe and exhibit knowledge of safe and proper handling for selected power tools: drivers; jig-saw; table saw.
- Identify and describe types and associated purposes of soft goods and fabrics used for set construction.
- Describe and differentiate the nature of flame retardant (FR) and inherently flame retardant (IFR) materials.
**Essential Question(s) (General):**
- What are the practical implications of the saying, “The right tool for the right job”?

**Essential Question(s) (Topic Specific):**
- How do I build this set?
- Which tools do I use for which job, and how do I use them?

**Suggested Activities:**
- PTT, Interactive DVD Series, Program 2
- Tool identification challenges
- Tool classification (cutting, joining, measuring or marking?) challenges
- Measuring and cutting practice using foam core boards.
- Practice use of cutting and joining tools with scrap lumber.

**Resources:**
- Access to OPA Auditorium Facilities
- *Practical Technical Theatre DVD Series*, Program 2
- [http://www.hstech.org/](http://www.hstech.org/)

**Assessment:**
Successful compliance with safety procedures
Completion of practice tasks
Group cooperation
Self/group assessment

**Interdisciplinary Connections:**
- ELA: Journal
- Mathematics: Units of measure
- Health: First Aid protocols; Safety procedures

---

**COURSE:** STAGECRAFT  
**UNIT III:** Scenic Elements and Set Construction  
**TOPIC #12:** Set Construction: Practical (part 2)

**CONTENT:**
- Construction requires general and practical knowledge of available tools and materials.
- Overview of safe and appropriate use of measuring tools, cutting and joining tools, power tools, lumber products and theatrical fabrics.
- Scenery construction is different from “real-world” construction. Though it is real and functional it is also temporary and representational.
- Practical application of set construction tools and materials.
- A production is not over until the stage is clear.

**STUDENT LEARNING OBJECTIVES:**
- Demonstrate and apply proper usage of all construction tools.
- Construct a flat (full size or scaled down), rehearsal cube or other unit of scenery.
- Observe and relate best practice protocols and safety guidelines for *Strike/Striking the Set*.

**Essential Question(s) (General):**
- Is it possible to create *something* out of *nothing*?

**Essential Question(s) (Topic Specific):**
- How are common scenic components constructed?
- What is difference between building a set and building a house?
**Suggested Activities:**
- **PTT**, Interactive DVD Series, Program 2
- Discuss and sketch components of a Broadway Flat
- Construct 1’x1’ frames using 1x3 for rails and stiles and scaled down luan corner blocks and \( \frac{1}{2} '' \) wood screws. Cover with muslin. OR
- Construct rehearsal cubes using wood or construct scaled-down versions using foam core.
- Practical application of techniques on set for current OPA/OHS production.
- Observe, discuss, journal on set strike (load-out) videos

**Assessment:**
Successful completion of flat construction
Accurate verbal expression during discussion
Group cooperation
Self/group assessment (Journal)

**COURSE:** STAGECRAFT

**UNIT III:** Scenic Elements and Set Construction

**TOPIC #13:** Elements of Scenic Art

**CONTENT:**
- Constructed elements of theatrical scenery are finished using a variety of materials, methods, textures and techniques.
- Painting techniques are used to give scenery texture and depth, whether it is realistic or abstract.

**STUDENT LEARNING OBJECTIVES:**
- Identify and compare scenic painting techniques: dry-brushing; splattering; distressing; sponge techniques; etc.
- Apply and incorporate scenic painting/decoration techniques in the creation of scenery.

**Essential Question(s) (General):**
- What is beautiful?
- What are aesthetics?

**Essential Question(s) (Topic Specific):**
- What is the difference between a set that represents something real and a set that suggests something real?

**Suggested Activities:**
- Reading: “Painting the Scene” by Sean O’Skea (see link in Resources)
- Practice painting techniques on mini flats built in construction lesson: basic application; scumbling; dry brushing; texturing with sponge.
- Practical application of techniques on set for current OPA/OHS production
- **Unit III Review/Midterm Review**

**Assessment:**
Accurate verbal expression/written response
Group cooperation

**Resources:**
Access to OPA Auditorium Facilities
**Practical Technical Theatre DVD Series**, Program 2
http://www.hstech.org/
http://schooltheatre.org/education/making/cubes
YouTube search: “IATSE Loads out”

**Interdisciplinary Connections:**
ELA: Journal, Speaking/Listening
Mathematics: Units of Measurement

**Visual Art**
## UNIT III: Written Assessment/Performance Task (construction of flat)
### Midterm Exam

### COURSE: STAGECRAFT
### GRADES 9-12
#### UNIT IV: Design/Practical Applications for Lighting, Set, Sound

**TOPIC #14: Theatrical Lighting Basics**

**CONTENT:**
- Theatrical lighting design is accomplished with specific types of lighting fixtures that differ according to lamp types, lens types and lens configuration.
- Different lighting fixtures have different uses, qualities and purposes.

**STUDENT LEARNING OBJECTIVES:**
- Identify and recall names of lighting instruments in the OPA Auditorium: ellipsoidal reflector (Leko-Lite); Fresnel; par can; border lights; scoops; cyclorama lights; follow spot.
- Summarize and contrast common usages of specific lighting instruments and lighting accessories.
- Demonstrate proper procedures for the hanging and focusing of lighting instruments.
- Observe and apply basic knowledge of OPA light board operation: on/off; master dimmers; sub-master presets.

**Essential Question(s) (General):**
- What is meant by the phrase, “Seeing is believing”?
- How is narrative expressed visually in a live setting?

**Essential Question(s) (Topic Specific):**
- What are the components of a theatrical lighting system?
- How many technicians does it take to switch a light bulb? [It’s NOT a BULB! It’s a LAMP!]

**Suggested Activities:**
- **PTT, DVD Series, Program 3**
- Perform light maintenance (dusting without moving the fixtures) on instruments on stage electrics. Identify types of fixtures, connectors (plugs: L5 twist-lock), gels (color filters), gel frames, **safety cables**, C-clamps.
- Exploratory “surgery” on extra fixtures: take apart, switch out lamps, etc.
- Create a focus template for the stage floor: position large sheets of paper and outline the pools of light. Strike and re-hang and re-focus specific instruments based on the focus template.

**Resources:**
- Access to OPA Auditorium Facilities
- *Practical Technical Theatre DVD Series* Program 3
- [http://www.hstech.org/](http://www.hstech.org/)
- Interviews with Theatre Professionals:
  - [http://americantheatrewing.org/careerguides/](http://americantheatrewing.org/careerguides/)

**Assessment:**
- Accurate recording and recalling of lighting fixtures and vocabulary
- Group cooperation
- Quiz: lighting instruments
- Self/group assessment (Journal)

**Interdisciplinary Connections:**
- ELA: Journal
- Technology: Electrical knowledge
- Science: qualities of light/reflection
- Math: degrees/angles (defines lighting field)
<table>
<thead>
<tr>
<th>COURSE: STAGECRAFT</th>
<th>GRADES 9-12</th>
</tr>
</thead>
<tbody>
<tr>
<td>UNIT IV: Design/Practical Applications for Lighting, Set, Sound</td>
<td>TOPIC #15: Intro to Lighting Design</td>
</tr>
</tbody>
</table>

**CONTENT:**
- The fundamental objectives of the lighting designer are to illuminate the action, establish the setting/mood, and help to tell the story.
- Careful analysis of the text and contextual research are required to render an effective theatrical design.
- Basic qualities of light include hue (color), intensity (brightness) and focus (direction).

**STUDENT LEARNING OBJECTIVES:**
- Recognize and practice precepts of text analysis in relation to the creation and execution of lighting design.
- Express and utilize the importance of image research in the creation and execution of theatrical lighting design.
- Hypothesize and inventory components necessary for the execution of lighting requirements for a given text.
- Create and execute an original lighting look based on simulated text/directorial requirements.
- Observe and discuss recorded interview(s) with professional, theatrical lighting designer(s).

**Essential Question(s) (General):**
- How does understanding a text affect my ability to express its themes and overall meanings?
- How is one art form translated into another?

**Essential Question(s) (Topic Specific):**
- How can a designer create a world using light?
- How can a designer tell a story using light?

**Suggested Activities:**
- *PTT*, DVD Series, Program 3
- “Lighting the Subject” lesson: students observe and qualify different lighting looks, then proceed to create “mini” design plots

**Resources:**
- Access to OPA Auditorium Facilities
- *Practical Technical Theatre DVD Series*, Program 3
- [http://schooltheatre.org/education/making/it-was-dark-and-stormy-night](http://schooltheatre.org/education/making/it-was-dark-and-stormy-night)
- [http://www.hstech.org/](http://www.hstech.org/)

**Assessment:**
- Accurate verbal expression/written response (Journal)
- Successful completion of accompanying worksheets
- Performance Task: mini-design plot
- Group cooperation
- Self/group assessment

**Interdisciplinary Connections:**
- ELA: Journal
- Technology: Electrical knowledge
- Science: qualities of light/reflection
- Math: degrees/angles (defines lighting field)
### CONTENT:
- The fundamental objectives of the set designer are to establish the setting/mood, assist the directors and actors in establishing a believable world, and to help tell the story.
- Careful analysis of the text and contextual research are required to render an effective theatrical design.
- Set design is impacted by many variables including: directorial vision; budget; spatial limitations; functionality; flow of transitions.
- Designers must not only express their work using narrative, diagrams (Computer Aided Design) and three-dimensional models, but they must also be able to communicate the abstract ideas of their designs verbally.

### STUDENT LEARNING OBJECTIVES:
- Recall and compare text analysis and research strategies for lighting design and apply them to theatrical scenic design.
- Develop and execute set design for a scene for a hypothetical or real production incorporating at least one, seamless setting transition (scene change).
- Construct a three-dimensional model to represent and original set design.
- Observe and discuss recorded interview(s) with professional, theatrical set designer(s).

### Essential Question(s) (General):
- In what way is a designer also a “problem solver”?
- How is one art form translated into another?

### Essential Question(s) (Topic Specific):
- How does a set designer create a believable and cohesive “world” for a production?
- What is the importance of a “seamless transition” in set design?

### Suggested Activities:
- PTT, DVD Series, Program 6
- Text analysis (excerpts) for OHS/OPA Musical and research contextual elements: genre, time period, previous productions
- Lesson Plan: *IRONMAN the Musical*. Create designs for hypothetical musical.
- Observe, discuss and propose different methods of transitions (scene changes)
- Create models of proposed set designs

### Resources:
- Access to OPA Auditorium Facilities
- *Practical Technical Theatre DVD Series*, Program 6
- http://www.hstech.org/
- For additional resources, see UNIT III, Topic #10
- Interviews with Theatre Professionals: http://americantheatrewing.org/careerguides/

### Assessment:
- Active verbal expression
- Successful completion of worksheets and journal entries
- Group cooperation
- Self/group assessment

### Interdisciplinary Connections:
- ELA: Writing, Speaking/Listening, Reading
- Mathematics: Geometric principals

### COURSE: STAGECRAFT

<tbody>
<tr>
<td>GRADES 9-12</td>
<td></td>
</tr>
</tbody>
</table>
**Stagecraft Curriculum**

**CONTENT:**
- The fundamental objectives of the theatrical sound designer are to amplify live sound when necessary, and employ the use of additional music/sound effects to establish setting/mood with and to help tell the story.
- Careful analysis of the text and contextual research are required to render an effective theatrical design.
- Designers must not only express their work using narrative and diagrams, but they must also be able to communicate the abstract ideas of their designs verbally.

**STUDENT LEARNING OBJECTIVES:**
- Recall, compare and contrast text analysis and research strategies for set and lighting design and apply them to theatrical sound design.
- Assess and inventory components necessary to execute sound design for two different styles of stage events.
- Compose and produce a narrative using music excerpts and sound effects with only minimal (or no) recorded text.
- Observe and discuss recorded interview(s) with professional, theatrical sound designer(s).

**Essential Question(s) (General):**
- How does sound impact our mental, physical and emotional states?
- How is one art form translated into another?

**Essential Question(s) (Topic Specific):**
- Besides amplification of live sound, what does a sound designer do?
- How is sound used to enhance the creation of the “world” of a production?

**Suggested Activities:**
- **PTT DVD Series, Program 4**
- Create a “sound story” using sound effects and musical clips (narrative should be minimal or non-existent). Students may then create lighting plots to accompany their sound story compositions.
- Simulate two different types of events for which students must develop and propose (“Pitch”) sound plots to accommodate the needs of the event.

**Resources:**
- Access to OPA Auditorium Facilities
- **Practical Technical Theatre DVD Series, Program 4**
- http://www.hstech.org/
- Interviews with Theatre Professionals: http://americantheatrewing.org/careerguides/

**Assessment:**
- Accurate verbal expression/written response
- Group cooperation
- Self/group assessment

**Interdisciplinary Connections:**
- ELA: Writing, Speaking/Listening, Reading
- Music
- Science: Acoustics

**COURSE: STAGECRAFT**

**UNIT IV: Design/Practical Applications for Lighting, Set, Sound**

**TOPIC #18: Sound System Operations: Practical Application**

**CONTENT:**
- Execution of theatrical sound design requires knowledge of live sound amplification techniques.
- Sound design is impacted by many variables including: directorial vision; budget; available equipment; performance space; performers’ vocal abilities.
**STUDENT LEARNING OBJECTIVES:**
- Recall and restate types of microphones and their associated uses: dynamic/cardioid vocal (wired and wireless); condenser/cardioid; boundary; lavaliere.
- Observe and apply **basic** knowledge of OPA sound board operation: on/off; frequently used channels; frequently used subs; frequently used components

<table>
<thead>
<tr>
<th>Essential Question(s) (General):</th>
<th>Essential Question(s) (Topic Specific):</th>
</tr>
</thead>
<tbody>
<tr>
<td>• How does auditory input impact our lives?</td>
<td></td>
</tr>
<tr>
<td>• What has the increasing volume of “the world” (noise pollution, mp3 players, greater volume in smaller sound devices) done to the human capacity to <strong>listen</strong>?</td>
<td></td>
</tr>
<tr>
<td>• How high is <strong>too loud</strong> and how low is <strong>not loud enough</strong>?</td>
<td></td>
</tr>
<tr>
<td>• How important is microphone placement?</td>
<td></td>
</tr>
</tbody>
</table>

**Suggested Activities:**
- Using lavaliere microphones simulate production where performers are individually mic'ed. All students learn and practice proper microphone placement and handling, and observe board operation. Advanced students learn and practice sound board operation.

**Resources:**
- Access to OPA Auditorium Facilities
- *Practical Technical Theatre DVD Series*
- http://www.hstech.org/

**Assessment:**
- Accurate verbal expression/written response
- Group cooperation
- Self/group assessment

**UNIT IV Review**

**UNIT IV: Written Assessment/Performance Assessment**

**COURSE: STAGECRAFT**

**UNIT V: Production Management/Careers**

**TOPIC #19: Production Stage Management (part 1)**

**CONTENT:**
- The duties of Production Stage Manager (PSM) are defined differently in amateur, educational, and professional theatre settings.
- The PSM facilitates a productive and functional environment during the rehearsal process.
- The PSM must not only apply critical thinking to solving problems arising during production/performance, but also to anticipate and resolve problems **before** they happen.
- The PSM is responsible for the smooth running of a show during performance; all cast and crew are under the PSM’s direction.
- In professional settings the PSM is responsible for compliance with Actors Equity Association (AEA) rules and regulations.

**STUDENT LEARNING OBJECTIVES:**
- Define and summarize the necessary skill set and duties required of a theatrical production stage manager.
- Organize and prepare comprehensive prompt book (production script) excerpt with detailed cue sheet. (Can be based on designs executed during earlier units.)

<tr>
<td>• Participate and improvise with classmates in PSM simulations and provide verbal feedback and written critique.</td>
</tr>
<tr>
<td>• Observe and discuss recorded interview(s) with professional, production stage manager(s).</td>
</tr>
</tbody>
</table>
### Essential Question(s) (General):
- How can problems be solved before they arise?
- What is the importance of a command structure in a working environment?
- What are effective strategies to resolve personal conflict?

### Essential Question(s) (Topic Specific):
- Why are PSMs represented by the same labor union as actors?
- What inter-personal skills does a PSM need?

### Suggested Activities:
- *PTT* DVD Series, Program 6
- Execute cues in created prompt book in simulated performance setting
- Collaborative groups prepare and propose “What if…” situations relating to problems that might arise any time during rehearsals, tech week, or the run of a production. Individual students play the part of PSM and work to resolve the situations. Student groups critique and self assess.

### Resources:
- Access to OPA Auditorium Facilities
- Practical Technical Theatre DVD Series, Program 6

### Assessment:
- Accurate verbal expression/written response
- Group cooperation
- Self/group assessment

### Interdisciplinary Connections:
- ELA: Writing, Reading, Speaking/Listening
- Conflict Resolution

---

**COURSE: STAGECRAFT**  
**GRADES 9-12**

**UNIT V: Production Management/Careers**

**TOPIC #20: Theatrical Careers/Union Affiliations**

**CONTENT:**
- Career preparation requires purposeful planning based on research, self-knowledge, and informed choices.
- Understanding the rules and requirements of theatrical unions is necessary to pursue a career in professional theatre.
- Types of jobs in the theatrical and entertainment industries are numerous and vary significantly.

**STUDENT LEARNING OBJECTIVES:**
- Research and discuss careers in technical theatre.
- Participate and improvise with classmates in PSM simulations and provide verbal feedback and written critique.
- Assess personal skill set/knowledge and hypothesize an appropriate job position with regards to technical theatre, production team or creative team.
- Identify and summarize the roles of Actors Equity Association (AEA), International Alliance of Theatrical Stage Employees (IATSE), Stage Directors and Choreographers Society (SDC) and United Scenic Artists Local USA 829 (USA829).
- Propose and research an educational pathway to working in a targeted discipline related to technical theatre.

### Essential Question(s) (General):
- What do you want to be when you “grow up”?
- What steps are necessary to plan for a fulfilling and productive future?

### Essential Question(s) (Topic Specific):
- What knowledge and skills are necessary to pursue a career in theatrical design or technical theatre?
- What educational and/or professional qualifications are necessary to pursue a career in theatrical design or technical theatre?
